

FORENSIC DELAY AND QUANTUM ANALYSIS

DAC Experts are appointed to provide an in-depth Forensic Delay and Disruption Analysis for complex construction projects which suffer from engineering or construction delays, and relevant cost overruns.

Our Experts have been appointed in some of the most challenging construction claims and disputes around the World, and have been cross-examined in High Court litigation and alternative dispute resolution (ADR – arbitration, mediation and adjudication). This includes cases under the Rules of the ICC, UNCITRAL, LCIA, DIFC, SIAC, and others.

Our work covers a broad range of projects:

- Geothermal Plants
- Infrastructure / Water and Gas Facilities
- FPSOs
- Gas Storage Facilities
- Gas Compression Plants
- LNG Plants / Facilities
- Manufacturing and Process Plants
- Oil and Gas Rigs / Platforms
- Pipelines
- Power Plants / Co-Generation Plants
- Recycling Plants
- Refineries
- Shipping (New-build and conversion)
- Solar Power Plants
- Steel Manufacturing Plants
- Waste and Water Treatment Facilities
- Waste to Energy Plants
- Wind Farms
